SUMMARY

Information Systems Engineer and full-stack developer with 4+ years of experience delivering enterprise web applications and nationwide information systems. Specialized in the Java ecosystem (JSF, PrimeFaces, Hibernate, Maven) and modern JavaScript stacks (Vue.js, Laravel, .NET), with strong command of Oracle and SQL Server. Skilled Git integrator with disciplined branching, code review and conflict-resolution practices. I know how to use AI as a working tool: I craft effective contexts for Claude and run agentic sessions in VS Code to accelerate delivery without losing control over the code. Focused on solving real problems with clean, maintainable and well-documented code.

HIGHLIGHTS

- Java • JSF • PrimeFaces • Hibernate
- Maven • NetBeans • Tomcat
- Vue.js • React • Laravel (PHP)
- ASP.NET Core • C#
- Oracle DB • SQL Server • MySQL
- JSP • HTML5 • CSS3 • Tailwind
- JavaScript (ES6+) • TypeScript
- REST APIs • Postman
- Git / GitHub / TortoiseSVN — advanced integration
- VS Code • AI with Claude • agentic sessions (confident use)
- AI context engineering
- Agile methodologies (Scrum)
- MVC architecture and clean code
- English (intermediate/advanced)
- Effective communication and teamwork
- Problem-solving and proactivity

EXPERIENCE

IT Linkage Reference (C), January/2026 - Present
INEGI (National Institute of Statistics and Geography)

- Development and evolution of IKTAN web modules on an enterprise Java stack: JSF + PrimeFaces, Hibernate, Maven and NetBeans, deployed on Tomcat.
- Advanced data modeling and queries on Oracle DB and SQL Server (PL/SQL, views, stored procedures).
- Day-to-day Git integration: branching strategy, code reviews and conflict resolution as a standard team practice.
- Disciplined use of AI in VS Code: leveraging Claude and agentic sessions with carefully designed contexts to speed up analysis, refactoring and documentation while staying in control of the code.
- Functional technical support to institutional users nationwide and liaison between IT and statistical areas.

IT Linkage Reference (A) and Statistical Linking Reference (B), September/2023 - June/2025
INEGI (National Institute of Statistics and Geography)

- Loading and validating national statistical data for the Administrative Record in Labor Justice Matters (RALAB).
- Development, support, and maintenance of modules in the IKTAN web system (JSP, JSF, Oracle, SQL Server).
- National-level technical support to judicial bodies.
- Version control with Git and TortoiseSVN; daily work with NetBeans, VS Code and Microsoft Office.

Junior Developer, December/2022 - August/2023
CCEO software development

- Database design and modeling.
- Frontend development with Vue.js, HTML, CSS, and JavaScript.
- API and backend development with Laravel (PHP + SQL) using the MVC model.
- Active participation in weekly sprints using Agile methodology.
- Version control with GitHub.
- Full development of a web-based ERP application for a private company.

Programmer and Designer of Administrative School Software, January/2021 - April/2022
Colegio Greenfield

- SQL database design and development.
- Java programming with database connection for administrative school modules.
- UI design and implementation of multiple functional CRUDs.
- Writing of queries, functions, and stored procedures for the school system.

EDUCATION

B.S. Strategic Information Systems Engineering, September/2019 - April/2023
POLYTECHNIC UNIVERSITY OF AGUASCALIENTES - Aguascalientes

High School: Programming, August/2016 - August/2019
CETis 155 (Center For Technological, Industrial, And Services Studies) - Aguascalientes

MORE ABOUT ME

- **Birthday:** August 3rd, 2001
- **Languages:** Spanish (native), English (intermediate/advanced)
- **Professional interests:** software architecture, AI applied to development, continuous process improvement.
